PROFILE

Detail-oriented technology enthusiast with strong skills in Java, Python, SQL, OOP, DSA, & Debugging. Skilled in trouble shooting, problem-solving, & developing technical solutions across software and IoT projects. Eager to contribute as a Technical Support Engineer and grow in a fast-paced technology environment.

SKILLS

- **Programming Languages:** Java, Python
- **Core Concepts:** OOP, Data Structures & Algorithms, Debugging
- **Technical Support:** Troubleshooting, Problem Solving, Application Testing
- **Database:** MySQL
- **Data Analysis:** NumPy, Pandas, Matplotlib, Seaborn
- **Web Technologies:** HTML5, CSS3

CERTIFICATES

- Java for Complete Beginners - UDEMY
- Python - CADD CENTRE
- Leadership – NPTEL COURSE
- MySQL - HackerRank

ACHIEVEMENTS

- **DSA & Competitive Programming:** Solved 70+ LeetCode, 80+ GFG, and 200+ CodeChef problems.
- **Databases:** MySQL Silver Level on HackerRank.
- **Programming:** HackerRank badges in Java and Python.
- **Competitions:** Participated in Code Warrior and Treasure Hunt events at Litfreq'z 2022.

EDUCATION

- Karpagam University, Coimbatore 2026
Master Of Computer Application, 9.33 CGPA
- Valluvar College Of Science & Management, Karur 2024
B.Sc [Computer Science], 8.96 CGPA
- Kongu Higher Secondary School, Karur 2021
Higher Secondary, 79.4%
- ST Theresa's Girls Hr. Sec. School, Karur 2019
SSLC, 69.2%

EXPERIENCE

Internship | INTER DECCAAN SOLUTIONS June 2023

- Embarked on a 15-day web development internship, where I immersed myself in the art of digital crafting.
- Gained hands-on experience in HTML and CSS for responsive web development.

Workshop | IITM, Chennai 18.12.2023 – 22.12.2023

- Attended a workshop at IITM and learned the basics of optical fiber and how data is transmitted.
- Understood simple concepts of network systems and their real-world uses.

PROJECT

ANDROID : Daily Routine Study Planner App

Tools: Android Studio | Languages: Java, XML

- Developed an Android application to help students efficiently manage their study schedules.
- Identified and troubleshooted file-handling and storage-related issues during development.
- Tested application features and resolved functional issues to improve application reliability.

IOT: Sleep Quality Monitor Using Heartbeat & Motion Sensor

Tools: Arduino, Sensors: SpO₂, Heartbeat and Motion Sensor

- Developed an IoT system using SpO₂, heartbeat, and motion sensors to monitor sleep patterns and transmit real-time data to the cloud via ESP32 for analysis and visualization.

WEBSITE : From Dream To The Destination - Tourism

Tools: Visual Studio | Languages: HTML, CSS, JS

- Developed an engaging platform that turns travel dreams into organized journeys, featuring destination insights, tailored packages, and hassle-free booking.
